Ready to party? Peyote stitch is easy with Superduos; you'll make this fun bracelet with cute seed bead scallops in no time at all. Use a favorite bead for a closure and dance the night away!

This pattern can be made by intermediate beaders or determined beginners; if you're just starting out, you'll probably want some help. If you've already worked with seed beads, and are comfortable following directions and diagrams, then this pattern is for you!

### Materials:

- 11° Round Seed Beads, Matte Metallic Dark Olive #11-92015-TB
- Superduo Beads, Bright Green, Item #DU0553410-TB
- Gemstone, Lampwork, or other large round bead (for clasp)
- Beading thread, 6lb test Fireline
- Size 12 or 13 Beading needles

### Step 1:

On a comfortable length of thread, add a stop bead, leaving a 12-15" tail.

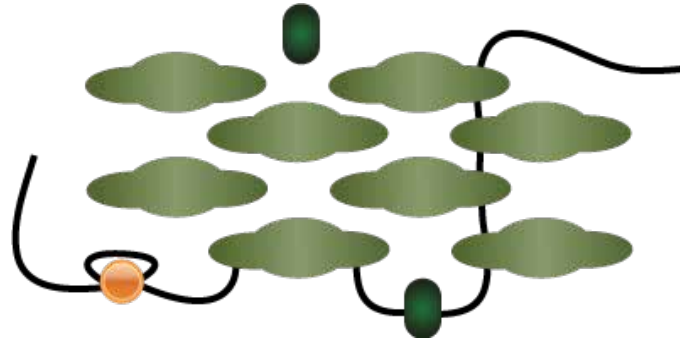

Pick up (4) Superduo beads.

**Step 2:**

Pick up (1) 11° and (1) Superduo. Go down through the second hole in the next Superduo in the column.

Pick up (1) Superduo and go through the second hole in the next Superduo in the column.

**Step 3:**

Pick up (1) 11° and (1) Superduo. Go up through the second hole in the next Superduo in the column.

Pick up (1) Superduo and go through the second hole in the next Superduo in the column.

**Step 4:**

Repeat Steps 2-3 until the bracelet is just long enough to go around your wrist. The closure will add extra length, so don't make it too long!

*Tip:*

Finish off and add thread by going through the beadwork without tying knots. Fireline can cut threads if you tie half-hitch knots around it.

**Step 5:**

Pick up (1) 11° and go down through the second hole in the next Superduo.

Pick up (1) 11° and go down through the second hole in the next Superduo.

**Step 6:**

Pick up (1) 11° and go through the last 11° you added in the previous step.

Pick up (1) 11° and go through the first 11° you added in the previous step.

**Step 7:**

Pick up (5) 11°, (1) Superduo, Clasp bead, (1) Superduo, and (3) 11°.

Go through the second hole in the last Superduo, the clasp bead, and the second hole in the first Superduo.

Pick up (5) 11° and go through the four 11° beads added in steps 5-6. Repeat the thread path 1-2 times to make it secure. Finish off the thread.

**Step 8:**

*Remove the stop bead and use the tail to make the second half of the clasp.*

Repeat Steps 5-6.

Pick up (3) 11°, (1) Superduo, and enough 11° beads to go around the clasp bead. You want it to fit snugly, but not so tight that you risk breaking the loop when fastening your bracelet.

Go through the second hole in the Superduo, and pick up (3) 11° beads. Go back through the four 11° beads. Repeat the thread path 1-2 more times to strengthen the loop. Fasten off the thread.

**Step 9:**

Start a new thread, coming out of the second hole in the top Superduo next to the loop end of the clasp.

Pick up (5) 11° beads and go down through the first hole of the next Superduo.

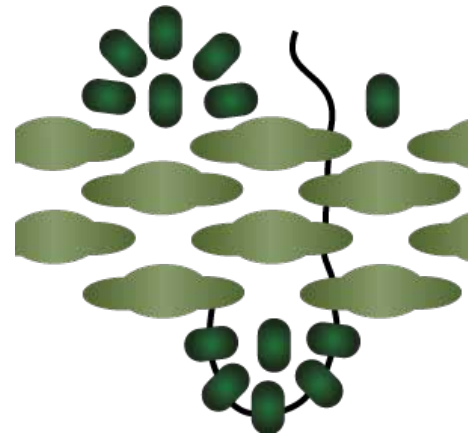

Go down through the rest of the Superduos in the column, as shown in the diagram.

**Step 10:**

Pick up (5) 11° beads and go up through the first hole of the next Superduo.

Go up through the rest of the Superduos in the column, as shown in the diagram.

Repeat Steps 9-10 to the end of the bracelet, and finish off your thread.

To fasten your bracelet, put the large bead through the loop.
